

Q1 Check Positive Number

Ans:- Code:-

```
public class Positive{  
    public static void main(String args[]) {  
        int num = -5;  
        if(num > 0) {  
            System.out.println("Positive number");  
        } else if(num < 0) {  
            System.out.println("Non Positive Number");  
        } else {  
            System.out.println("number is zero");  
        }  
    }  
}
```

Q2 Check Negative Number

Ans:- Code:

```
public class Negative{  
    public static void main(String args[]) {  
        int num = 10;  
        if(num < 0){  
            System.out.println("Negative Number");  
        } else if (num > 0) {  
            System.out.println("Non negative number");  
        } else {  
            System.out.println("Zero");  
        }  
    }  
}
```

Q3 Check Odd or Even Number

Ans:- Code:

```
public class OddEven{  
    public static void main(String args[]) {  
        int num = 1;  
        if(num % 2 == 0) {  
            System.out.println("Even Number");  
        } else {  
            System.out.println("Odd Number");  
        }  
    }  
}
```

Q4 Display Good Morning Message Based on Time

Ans:- Code:

```
import java.util.Scanner;  
public class GoodMorning {  
    public static void main(String args[]) {  
        Scanner scanner = new Scanner(System.in);  
  
        System.out.print("Enter the number between 5 and 12: ");  
        int time = scanner.nextInt();  
  
        if (time > 5 && time < 12) {  
            System.out.println("Good Morning");  
        } else {  
            System.out.println("NA");  
        }  
  
        scanner.close();  
    }  
}
```

Q5 Print Area of a Square

Ans:- Code:

```
public class AreaSquare {  
    public static void main(String args[]) {  
        int side = 5;  
        int area = side * side;  
        System.out.println("The area of the square is " + area + ".");  
    }  
}
```

Q6 Print Area of a Rectangle

Ans:- Code:

```
public class RectangleArea {  
    public static void main (String args[]) {  
        int length = 5;  
        int bredth = 10;  
        int area = length * bredth;  
        System.out.println("The area of the Rectangle is " + area + ".");  
    }  
}
```

Q7 Find the Largest of Three Numbers

Ans:- Code:

```
public class Largest {  
    public static void main (String args[]) {  
  
        int a = 55;  
        int b = 30;  
        int c = 40;  
  
        if (a>b && a>c) {
```

```
        System.out.println("a is the largest number");
    } else if (b>a && b>c) {
        System.out.println("b is the largest number");
    } else {
        System.out.println("c is the largest number");
    }
}
}
```
